# Audit Summary

This report has been prepared for Belka Token on the Binance Chain network. KISHIELD provides both client-centered and user-centered examination of the smart contracts and their current status when applicable. This report represents the security assessment made to find issues and vulnerabilities on the source code along with the current liquidity and token holder statistics of the protocol.

A comprehensive examination has been performed, utilizing Cross Referencing, Static Analysis, In-House Security Tools, and line-by-line Manual Review.

The auditing process pays special attention to the following considerations:

- Ensuring contract logic meets the specifications and intentions of the client without exposing the user's funds to risk.
- Testing the smart contracts against both common and uncommon attack vectors.
- Inspecting liquidity and holders statistics to inform the current status to both users and client when applicable.
- Assessing the codebase to ensure compliance with current best practices and industry standards.
- Verifying contract functions that allow trusted and/or untrusted actors to mint, lock, pause, and transfer assets.
- Thorough line-by-line manual review of the entire codebase by industry experts.

# Project Overview

## Token Summary

Parameter	Result
Address	0x9Fd530fC6e6E1f37d57f4A06DF72D456E408699E
Name	Belka
Token Tracker	Belka (BELKA)
Decimals	9
Supply	2,000,000,000
Platform	Binance Chain
compiler	v0.8.7+commit.e28d00a7
Optimization	Yes with 200 runs
LicenseType	MIT
Language	Solidity
Codebase	<a href="https://bscscan.com/address/0x9Fd530fC6e6E1f37d57f4A06DF72D456E408699E">https://bscscan.com/ address/0x9Fd530fC6e6E1f37d57f4A06DF72D456E408699E</a>
Url	<a href="https://belkaproject.io/">https://belkaproject.io/</a>

## Main Contract Assessed

Name	Contract	Live
Belka	0x9Fd530fC6e6E1f37d57f4A06DF72D456E408699E	Yes

# Smart Contract Vulnerability Checks

Vulnerability	Automatic Scan	Manual Scan	Result
Unencrypted Private Data On-Chain	Complete	Complete	✓ Low / No Risk
Code With No Effects	Complete	Complete	✓ Low / No Risk
Message call with hardcoded gas amount	Complete	Complete	✓ Low / No Risk
Hash Collisions With Multiple Variable Length Arguments	Complete	Complete	✓ Low / No Risk
Unexpected Ether balance	Complete	Complete	✓ Low / No Risk
Presence of unused variables	Complete	Complete	✓ Low / No Risk
Right-To-Left-Override control character (U+202E)	Complete	Complete	✓ Low / No Risk
Typographical Error	Complete	Complete	✓ Low / No Risk
DoS With Block Gas Limit	Complete	Complete	✓ Low / No Risk
Arbitrary Jump with Function Type Variable	Complete	Complete	✓ Low / No Risk
Insufficient Gas Griefing	Complete	Complete	✓ Low / No Risk
Incorrect Inheritance Order	Complete	Complete	✓ Low / No Risk
Write to Arbitrary Storage Location	Complete	Complete	✓ Low / No Risk
Requirement Violation	Complete	Complete	✓ Low / No Risk
Missing Protection against Signature Replay Attacks	Complete	Complete	✓ Low / No Risk
Weak Sources of Randomness from Chain Attributes	Complete	Complete	✓ Low / No Risk

Vulnerability	Automatic Scan	Manual Scan	Result
Authorization through tx.origin	Complete	Complete	✓ Low / No Risk
Delegatecall to Untrusted Callee	Complete	Complete	✓ Low / No Risk
Use of Deprecated Solidity Functions	Complete	Complete	✓ Low / No Risk
Assert Violation	Complete	Complete	✓ Low / No Risk
Reentrancy	Complete	Complete	✓ Low / No Risk
Unprotected SELFDESTRUCT Instruction	Complete	Complete	✓ Low / No Risk
Unprotected Ether Withdrawal	Complete	Complete	✓ Low / No Risk
Unchecked Call Return Value	Complete	Complete	✓ Low / No Risk
Outdated Compiler Version	Complete	Complete	✓ Low / No Risk
Integer Overflow and Underflow	Complete	Complete	✓ Low / No Risk
Function Default Visibility	Complete	Complete	✓ Low / No Risk

## Contract Ownership

The contract ownership of Belka is not currently renounced. The ownership of the contract grants special powers to the protocol creators, making them the sole addresses that can call sensible ownable functions that may alter the state of the protocol.

The current owner is the address 0x198Ee82b740DcBa91458B5faC95C93EE5B07D6bD which can be viewed from:  
[HERE](#)

The owner wallet has the power to call the functions displayed on the privileged functions chart below, if the owner wallet is compromised this privileges could be exploited.

We recommend the team to renounce ownership at the right timing if possible, or gradually migrate to a timelock with governing functionalities in respect of transparency and safety considerations.

## Important Notes To The Users:

- The owner cannot mint tokens after initial deployment.
- The owner cannot stop Trading.
- The owner cannot set the fees over 25%.
- Once the owner renounces ownership of the contract, none of the following are applicable.
- The owner can exclude/include wallets from fees exempt.
- The owner can change the max tx amount.
- The owner can withdraw BNB from the contract.

## Audit Passed

# Findings Summary

## Classification of Issues

Severity	Description
● High	Exploits, vulnerabilities or errors that will certainly or probabilistically lead towards loss of funds, control, or impairment of the contract and its functions. Issues under this classification are recommended to be fixed with utmost urgency
● Medium	Bugs or issues with that may be subject to exploit, though their impact is somewhat limited. Issues under this classification are recommended to be fixed as soon as possible.
● Low	Effects are minimal in isolation and do not pose a significant danger to the project or its users. Issues under this classification are recommended to be fixed nonetheless.
● Info	Consistency, syntax or style best practices. Generally pose a negligible level of risk, if any.

## Findings

Severity	Found
● High	0
● Medium	0
● Low	1
● Info	2
Total	3

# Findings

## Too many digits

ID	Severity	Contract	Function
01	● Informational	Belka	Variables_tTotal

### Description

Literals with many digits are difficult to read and review.

### Recommendation

Make use of scientific notation, use underscores, and/or use ether suffix.

## Division before Multiplication

ID	Severity	Contract	Function
02	● Low	Belka	function _transferStandard()

### Description

Precision Loss. Division before multiplication can result in truncation and less accurate results

### Recommendation

Multiplication should be performed before division to not lose precision.

## Code with no effects

ID	Severity	Contract	Function
03	● Informational	Belka	inSwap variable

### Description

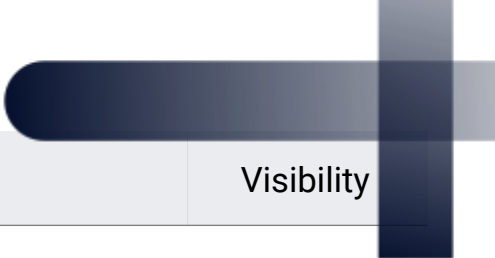

Bools are set to false by default.

### Recommendation

We recommend deleting the initialization of the boolean variable to false

## Privileged Functions (onlyOwner)

Function Name	Parameters	Visibility
renounceOwnership	none	public
transferOwnership	address newOwner	public
setIsExcludedFromFee	address _address, bool _isExcluded	external
setProjectWallet	address _address	external
setBuybackWallet	address _address	external
setMarketingWallet	address _address	external
setOperationsWallet	address _address	external
setRemoveAllFee	none	external
setRestoreAllFee	none	external
swapTokensForEth	none	private
setBuyFee	uint256 buyFee	external
setSellFee	uint256 sellFee	external
setMaxTxPercent	uint256 maxTxPercent, uint256 power	external
setNumTokensToAddToLiquidity	uint256 percent, uint256 power	external
manualSwap	none	external
setSwapAndLiquifyEnabled	bool _enabled	external

Function Name	Parameters	Visibility
withdrawResidualBnb	address newAddress	external
withdrawResidualErc20	calldata token, address to	external

# Statistics

## Liquidity Info

Parameter	Result
Pair Address	0x3d01B696Bd542038B4A7F6E3345553b783A2c402
BELKA Reserves	0.00 BELKA
BNB Reserves	0.00 BNB
Liquidity Value	\$0 USD

## Token (BELKA) Holders Info

Parameter	Result
BELKA Percentage Burnt	0.00%
BELKA Amount Burnt	0 BELKA
Top 10 Percentage Own	100.00%
Top 10 Amount Owned	2,000,000,000 BELKA
Top 10 Aprox Value	\$NaN USD

## LP (BELKA/BNB) Holders Info

Parameter	Result
BELKA/BNB % Burnt	0.00%
BELKA/BNB Amount Burnt	0 BELKA
Top 10 Percentage Owned	0.00%
Top 10 Amount Owned	0 BELKA
Locked Tokens Percentage	0.00%
Locked Tokens Amount	0 BELKA

\* All the data displayed above was taken on-chain at block 16883344

\* The tokens on industry-standard burn wallets are not included on the top 10 wallets calculations

## Liquidity Ownership

The token does not have liquidity at the moment of the audit, block 16883344

# KISHIELD

## Disclaimer

KISHIELD has conducted an independent audit to verify the integrity of and highlight any vulnerabilities or errors, intentional or unintentional, that may be present in the codes that were provided for the scope of this audit. This audit report does not constitute agreement, acceptance or advocacy for the Project that was audited, and users relying on this audit report should not consider this as having any merit for financial advice in any shape, form or nature. The contracts audited do not account for any economic developments that may be pursued by the Project in question, and that the veracity of the findings thus presented in this report relate solely to the proficiency, competence, aptitude and discretion of our independent auditors, who make no guarantees nor assurance that the contracts are completely free of exploits, bugs, vulnerabilities or deprecation of technologies.

All information provided in this report does not constitute financial or investment advice, nor should it be used to signal that any persons reading this report should invest their funds without sufficient individual due diligence regardless of the findings presented in this report. Information is provided 'as is', and KISHIELD is under no covenant to the completeness, accuracy or solidity of the contracts audited. In no event will KISHIELD or its partners, employees, agents or parties related to the provision of this audit report be liable to any parties for, or lack thereof, decisions and/or actions with regards to the information provided in this audit report.

The assessment services provided by KISHIELD is subject to dependencies and under continuing development. You agree that your access and/or use, including but not limited to any services, reports, and materials, will be at your sole risk on an as-is, where-is, and as-available basis. Cryptographic tokens are emergent technologies and carry with them high levels of technical risk and uncertainty. The assessment reports could include false positives, false negatives, and other unpredictable results. The services may access, and depend upon, multiple layers of third-parties.
