Audit Summary

This report has been prepared for ET COIN WEB3 Token on the Binance Chain network. KISHIELD provides both client-centered and user-centered examination of the smart contracts and their current status when applicable. This report represents the security assessment made to find issues and vulnerabilities on the source code along with the current liquidity and token holder statistics of the protocol.

A comprehensive examination has been performed, utilizing Cross Referencing, Static Analysis, In-House Security Tools, and line-by-line Manual Review.

The auditing process pays special attention to the following considerations:

- Ensuring contract logic meets the specifications and intentions of the client without exposing the user's funds to risk.
- Testing the smart contracts against both common and uncommon attack vectors.
- Inspecting liquidity and holders statistics to inform the current status to both users and client when applicable.
- Assessing the codebase to ensure compliance with current best practices and industry standards.
- Verifying contract functions that allow trusted and/or untrusted actors to mint, lock, pause, and transfer assets.
- Thorough line-by-line manual review of the entire codebase by industry experts.

Project Overview

Token Summary

Parameter	Result
Address	0xF916262b009ebCA9E603AB31a905e256AfE0a62E
Name	ET COIN WEB3
Token Tracker	ET COIN WEB3 (ETCWEB3)
Decimals	18
Supply	1,000,000,000,000,000
Platform	Binance Chain
compiler	v0.8.6+commit.11564f7e
Optimization	Yes with 200 runs
LicenseType	MIT
Language	Solidity
Codebase	https://bscscan.com/ address/0xF916262b009ebCA9E603AB31a905e256AfE0a62E
Url	https://pigwarrior.xyz/

Main Contract Assessed

Name	Contract	Live
ET COIN WEB3	0xF916262b009ebCA9E603AB31a905e256AfE0a62E	Yes

Smart Contract Vulnerability Checks

Vulnerability	Automatic Scan	Manual Scan	Result
Unencrypted Private Data On-Chain	Complete	Complete	✓ Low / No Risk
Code With No Effects	Complete	Complete	✓ Low / No Risk
Message call with hardcoded gas amount	Complete	Complete	✓ Low / No Risk
Hash Collisions With Multiple Variable Length Arguments	Complete	Complete	✓ Low / No Risk
Unexpected Ether balance	Complete	Complete	✓ Low / No Risk
Presence of unused variables	Complete	Complete	✓ Low / No Risk
Right-To-Left-Override control character (U+202E)	Complete	Complete	✓ Low / No Risk
Typographical Error	Complete	Complete	✓ Low / No Risk
DoS With Block Gas Limit	Complete	Complete	✓ Low / No Risk
Arbitrary Jump with Function Type Variable	Complete	Complete	✓ Low / No Risk
Insufficient Gas Griefing	Complete	Complete	✓ Low / No Risk
Incorrect Inheritance Order	Complete	Complete	✓ Low / No Risk
Write to Arbitrary Storage Location	Complete	Complete	✓ Low / No Risk
Requirement Violation	Complete	Complete	✓ Low / No Risk
Missing Protection against Signature Replay Attacks	Complete	Complete	✓ Low / No Risk
Weak Sources of Randomness from Chain Attributes	Complete	Complete	✓ Low / No Risk

Vulnerability	Automatic Scan	Manual Scan	Result
Authorization through tx.origin	Complete	Complete	✓ Low / No Risk
Delegatecall to Untrusted Callee	Complete	Complete	✓ Low / No Risk
Use of Deprecated Solidity Functions	Complete	Complete	✓ Low / No Risk
Assert Violation	Complete	Complete	✓ Low / No Risk
Reentrancy	Complete	Complete	✓ Low / No Risk
Unprotected SELFDESTRUCT Instruction	Complete	Complete	✓ Low / No Risk
Unprotected Ether Withdrawal	Complete	Complete	✓ Low / No Risk
Unchecked Call Return Value	Complete	Complete	✓ Low / No Risk
Outdated Compiler Version	Complete	Complete	✓ Low / No Risk
Integer Overflow and Underflow	Complete	Complete	✓ Low / No Risk
Function Default Visibility	Complete	Complete	✓ Low / No Risk

Contract Ownership

The contract does not have an owner.

Having no owner means that all the ownable functions in the contract can not be called by anyone, this often leads to more trust on the project.

Important Notes To The Users:

- The owner cannot mint tokens after initial deployment.
- The owner cannot stop Trading.
- The owner cannot change the fees amount.
- The owner cannot change the max tx amount.
- Users cannot buy twice in the same block.
- The max tx amount is set to the total supply.
- Once the owner renounces ownership of the contract, none of the following are applicable.
- The owner can add/remove addresses from fees
- No high-risk Exploits/Vulnerabilities Were Found in token Source Code.

Audit Passed

Findings Summary

Classification of Issues

Severity	Description
● High	Exploits, vulnerabilities or errors that will certainly or probabilistically lead towards loss of funds, control, or impairment of the contract and its functions. Issues under this classification are recommended to be fixed with utmost urgency
● Medium	Bugs or issues with that may be subject to exploit, though their impact is somewhat limited. Issues under this classification are recommended to be fixed as soon as possible.
● Low	Effects are minimal in isolation and do not pose a significant danger to the project or its users. Issues under this classification are recommended to be fixed nonetheless.
● Info	Consistency, syntax or style best practices. Generally pose a negligible level of risk, if any.

Findings

Severity	Found
● High	0
● Medium	0
● Low	0
● Info	6
Total	6

Findings

Variables could be declared as constant

ID	Severity	Contract	Function
01	Informational	ET COIN WEB3	variables _marketingFee, _liquidityFee, _marketingWallet, _buyCooldown, _tTotal

Description

Gas Optimization. Variables that are never changed could be declared as constant.

Recommendation

We recommend declaring those variables as constant.

Public function that could be declared external

ID	Severity	Contract	Function
02	Informational	ET COIN WEB3	Functions function excludeFromFee, includeInFee

Description

Gas Optimization. Public function that could be declared external

Recommendation

Public functions that are never called by the contract should be declared external to save gas.

Too many digits

ID	Severity	Contract	Function
03	Informational	ET COIN WEB3	Variables _tTotal, _maxTxAmount

Description

Literals with many digits are difficult to read and review.

Recommendation

Make use of scientific notation, use underscores, and/or use ether suffix.

Unused Private Function

ID	Severity	Contract	Function
04	Informational	ET COIN WEB3	functions swapAndLiquify() addLiquidity()

Description

These functions are never used by the contract logic.

Recommendation

We recommend deleting this function or setting the visibility to external if they are meant to be used.

Code with no effects

ID	Severity	Contract	Function
05	Informational	ET COIN WEB3	function _transfer()

Description

The following expression "balanceOf(to) + amount <= _maxTxAmount" has no effects as the balance of to cannot be greater than the total supply.

Recommendation

We recommend deleting this require expression or setting the _maxTxAmount to a lower value

Code with no effects

ID	Severity	Contract	Function
06	Informational	ET COIN WEB3	function _transfer()

Description

The following expression "lastBuy[to] + _buyCooldown < block.timestamp" The sum of _buyCooldown has no effects as _buyCooldown is set to 0 minutes.

Recommendation

We recommend deleting this require expression or setting the _buyCooldown to a higher value

Privileged Functions (onlyOwner)

Function Name	Parameters	Visibility
renounceOwnership	none	public
transferOwnership	address newOwner	public
excludeFromFee	address account	public
includeInFee	address account	public

Statistics

Liquidity Info

Parameter	Result
Pair Address	0x4d10ffE34e4F6428bAd21272ac1Ce61582572CDe
ETCWEB3 Reserves	0.00 ETCWEB3
BNB Reserves	0.00 BNB
Liquidity Value	\$0 USD

Token (ETCWEB3) Holders Info

Parameter	Result
ETCWEB3 Percentage Burnt	0.00%
ETCWEB3 Amount Burnt	0 ETCWEB3
Top 10 Percentage Own	100.00%
Top 10 Amount Owned	1,000,000,000,000,000 ETCWEB3
Top 10 Aprox Value	\$NaN USD

LP (ETCWEB3/BNB) Holders Info

Parameter	Result
ETCWEB3/BNB % Burnt	0.00%
ETCWEB3/BNB Amount Burnt	0 ETCWEB3
Top 10 Percentage Owned	0.00%
Top 10 Amount Owned	0 ETCWEB3
Locked Tokens Percentage	0.00%
Locked Tokens Amount	0 ETCWEB3

* All the data displayed above was taken on-chain at block 16801739

* The tokens on industry-standard burn wallets are not included on the top 10 wallets calculations

Liquidity Ownership

The token does not have liquidity at the moment of the audit, block 16801739

KISHIELD

Disclaimer

KISHIELD has conducted an independent audit to verify the integrity of and highlight any vulnerabilities or errors, intentional or unintentional, that may be present in the codes that were provided for the scope of this audit. This audit report does not constitute agreement, acceptance or advocacy for the Project that was audited, and users relying on this audit report should not consider this as having any merit for financial advice in any shape, form or nature. The contracts audited do not account for any economic developments that may be pursued by the Project in question, and that the veracity of the findings thus presented in this report relate solely to the proficiency, competence, aptitude and discretion of our independent auditors, who make no guarantees nor assurance that the contracts are completely free of exploits, bugs, vulnerabilities or deprecation of technologies.

All information provided in this report does not constitute financial or investment advice, nor should it be used to signal that any persons reading this report should invest their funds without sufficient individual due diligence regardless of the findings presented in this report. Information is provided 'as is', and KISHIELD is under no covenant to the completeness, accuracy or solidity of the contracts audited. In no event will KISHIELD or its partners, employees, agents or parties related to the provision of this audit report be liable to any parties for, or lack thereof, decisions and/or actions with regards to the information provided in this audit report.

The assessment services provided by KISHIELD is subject to dependencies and under continuing development. You agree that your access and/or use, including but not limited to any services, reports, and materials, will be at your sole risk on an as-is, where-is, and as-available basis. Cryptographic tokens are emergent technologies and carry with them high levels of technical risk and uncertainty. The assessment reports could include false positives, false negatives, and other unpredictable results. The services may access, and depend upon, multiple layers of third-parties.
