# Spikey Inu Token

April 11, 2022

# **Table of Contents**

- **1 Audit Summary**
- 2 Project Overview
  - 2.1 Token Summary
  - 2.2 Main Contract Assessed
- 3 Smart Contract Vulnerability Checks
- **4 Contract Ownership** 
  - 4.1 Priviliged Functions
- **5 Important Notes To The Users**
- **6 Findings Summary** 
  - 6.1 Classification of Issues
  - 6.1 Findings Table
  - 01 Variables could be declared as constant
  - 02 Public function that could be declared external
  - 03 Missing events arithmetic
  - 04 Boolean equality
- 7 Statistics
  - 7.1 Liquidity
  - 7.2 Token Holders
  - 7.3 Liquidity Holders
- **8 Liquidity Ownership**
- 9 Disclaimer

# **Audit Summary**

This report has been prepared for Spikey Inu Token on the Binance Chain network. KISHIELD provides both client-centered and user-centered examination of the smart contracts and their current status when applicable. This report represents the security assessment made to find issues and vulnerabilities on the source code along with the current liquidity and token holder statistics of the protocol.

A comprehensive examination has been performed, utilizing Cross Referencing, Static Analysis, In-House Security Tools, and line-by-line Manual Review.

The auditing process pays special attention to the following considerations:

- Ensuring contract logic meets the specifications and intentions of the client without exposing the user's funds to risk.
- Testing the smart contracts against both common and uncommon attack vectors.
- Inspecting liquidity and holders statistics to inform the current status to both users and client when applicable.
- Assessing the codebase to ensure compliance with current best practices and industry standards.
- Verifying contract functions that allow trusted and/or untrusted actors to mint, lock, pause, and transfer assets.
- Thorough line-by-line manual review of the entire codebase by industry experts.

# **Project Overview**

### **Token Summary**

Parameter	Result
Address	0x7Fe44499a87C2b971f7506e83aD53aCc947A6621
Name	Spikey Inu
Token Tracker	Spikey Inu (SPINU)
Decimals	9
Supply	100,000,000
Platform	Binance Chain
compiler	v0.8.4+commit.c7e474f2
Optimization	Yes with 200 runs
LicenseType	MIT
Language	Solidity
Codebase	https://bscscan.com/ address/0x7Fe44499a87C2b971f7506e83aD53aCc947A6621
Url	https://spikeyinu.com

#### **Main Contract Assessed**

Name	Contract	Live
Spikey Inu	0x7Fe44499a87C2b971f7506e83aD53aCc947A6621	Yes

# **Smart Contract Vulnerability Checks**

Vulnerability	Automatic Scan	Manual Scan	Result
Unencrypted Private Data On-Chain	Complete	Complete	✓ Low / No Risk
Code With No Effects	Complete	Complete	✓ Low / No Risk
Message call with hardcoded gas amount	Complete	Complete	✓ Low / No Risk
Hash Collisions With Multiple Variable Length Arguments	Complete	Complete	✓ Low / No Risk
Unexpected Ether balance	Complete	Complete	✓ Low / No Risk
Presence of unused variables	Complete	Complete	✓ Low / No Risk
Right-To-Left-Override control character (U+202E)	Complete	Complete	<b>⊘</b> Low / No Risk
Typographical Error	Complete	Complete	✓ Low / No Risk
DoS With Block Gas Limit	Complete	Complete	✓ Low / No Risk
Arbitrary Jump with Function Type Variable	Complete	Complete	✓ Low / No Risk
Insufficient Gas Griefing	Complete	Complete	✓ Low / No Risk
Incorrect Inheritance Order	Complete	Complete	✓ Low / No Risk
Write to Arbitrary Storage Location	Complete	Complete	✓ Low / No Risk
Requirement Violation	Complete	Complete	✓ Low / No Risk
Missing Protection against Signature Replay Attacks	Complete	Complete	<b>⊘</b> Low / No Risk
Weak Sources of Randomness from Chain Attributes	Complete	Complete	✓ Low / No Risk

Vulnerability	Automatic Scan	Manual Scan	Result
Authorization through tx.origin	Complete	Complete	✓ Low / No Risk
Delegatecall to Untrusted Callee	Complete	Complete	✓ Low / No Risk
Use of Deprecated Solidity Functions	Complete	Complete	✓ Low / No Risk
Assert Violation	Complete	Complete	✓ Low / No Risk
Reentrancy	Complete	Complete	✓ Low / No Risk
Unprotected SELFDESTRUCT Instruction	Complete	Complete	✓ Low / No Risk
Unprotected Ether Withdrawal	Complete	Complete	✓ Low / No Risk
Unchecked Call Return Value	Complete	Complete	✓ Low / No Risk
Outdated Compiler Version	Complete	Complete	✓ Low / No Risk
Integer Overflow and Underflow	Complete	Complete	✓ Low / No Risk
Function Default Visibility	Complete	Complete	✓ Low / No Risk

# **Contract Ownership**

The contract ownership of Spikey Inu is not currently renounced. The ownership of the contract grants special powers to the protocol creators, making them the sole addresses that can call sensible ownable functions that may alter the state of the protocol.

The current owner is the address 0xe4e1d0568207348701c3395769b0fa4d31dda166 which can be viewed from:

#### **HERE**

The owner wallet has the power to call the functions displayed on the priviliged functions chart below, if the owner wallet is compromised this privileges could be exploited.

We recommend the team to renounce ownership at the right timing if possible, or gradually migrate to a timelock with governing functionalities in respect of transparency and safety considerations.

# **Important Notes To The Users:**

- The owner cannot mint tokens after intial deployment.
- The owner cannot stop Trading.
- The owner cannot set the fees amount over 25%.
- The owner cannot change the max tx amount.
- Once the owner renounces ownership of the contract, none of the following are applicable.
- The owner can trigger the buyBack which buys and send tokens to the dead address.
- The owner can change the auto buyBack and its multiplier settings.
- The owner can enable/disable and change the swap back settings and target liquidity.
- The owner can change the distribution criteria and the distributor gas.
- The owner can add/remove addresses from dividents and fees.
- No high-risk Exploits/Vulnerabilities Were Found in token Source Code.

# **Audit Passed**

# **Findings Summary**

### Classification of Issues

Severity	Description
High	Exploits, vulnerabilities or errors that will certainly or probabilistically lead towards loss of funds, control, or impairment of the contract and its functions. Issues under this classification are recommended to be fixed with utmost urgency
Medium	Bugs or issues with that may be subject to exploit, though their impact is somewhat limited. Issues under this classification are recommended to be fixed as soon as possible.
Low	Effects are minimal in isolation and do not pose a significant danger to the project or its users. Issues under this classification are recommended to be fixed nonetheless.
Info	Consistency, syntax or style best practices. Generally pose a negligible level of risk, if any.

### **Findings**

Severity	Found
High	0
Medium	0
Low	0
Info	4
Total	4

# **Findings**

#### Variables could be declared as constant

ID	Severity	Contract	Function
01	<ul><li>Informational</li></ul>	Spikey Inu	variables _name, _symbol, _totalSupply, rewardToken

#### **Description**

Gas Optimization. Variables that are never changed could be declared as constant.

#### Recommendation

We recommend declaring those variables as constant.

#### Public function that could be declared external

ID	Severity	Contract	Function
02	Informational	Spikey Inu	Functions functions setFees, transferOwnership, unauthorize, authorize

#### Description

Gas Optimization. Public function that could be declared external

#### Recommendation

Public functions that are never called by the contract should be declared external to save gas.

#### Missing events arithmetic

ID	Severity	Contract	Function
03	<ul><li>Informational</li></ul>	Spikey Inu	Missing events for etDistributionCriteria, setAutoBuybackSettings, setBuybackMultiplierSettings, setSwapBackSettings, setTargetLiquidity

#### **Description**

Functions that change critical arithmetic parameters should emit an event.

#### Recommendation

Emit corresponding events for critical parameter changes.

#### **Boolean equality**

ID	Severity	Contract	Function
04	Informational	Spikey Inu	modifier onlyBuybacker()

#### **Description**

Boolean constants can be used directly and do not need to be compare to true or false.

#### Recommendation

Remove the equality to the boolean constant.

# Priviliged Functions (onlyOwner)

Function Name	Parameters	Visibility
authorize	address adr	public
unauthorize	address adr	public
transferOwnership	address adr	public
triggerZeusBuyback	none	external
clearBuybackMultiplier	none	external
buyTokens	none	internal
setAutoBuybackSettings	none	external
setBuybackMultiplierSettings	none	external
setIsDividendExempt	none	external
setIsFeeExempt	none	external
setBuyBacker	none	external
setFees	none	public
setFeeReceivers	none	external
setSwapBackSettings	none	external
setTargetLiquidity	none	external
setDistributionCriteria	none	external
setDistributorSettings	none	external

# **Statistics**

### **Liquidity Info**

Parameter	Result
Pair Address	0x99c9aECe5B5693d2F67Ac03cD46c95d2a79628e6
SPINU Reserves	0.00 SPINU
BNB Reserves	0.00 BNB
Liquidity Value	\$0 USD

#### **Token (SPINU) Holders Info**

Parameter	Result
SPINU Percentage Burnt	0.00%
SPINU Amount Burnt	0 SPINU
Top 10 Percentage Own	100.00%
Top 10 Amount Owned	100,000,000 SPINU
Top 10 Aprox Value	\$NaN USD

#### LP (SPINU/BNB) Holders Info

Parameter	Result
SPINU/BNB % Burnt	0.00%
SPINU/BNB Amount Burnt	0 SPINU
Top 10 Percentage Owned	0.00%
Top 10 Amount Owned	0 SPINU
Locked Tokens Percentage	0.00%
Locked Tokens Amount	0 SPINU

<sup>\*</sup> All the data diplayed above was taken on-chain at block 16860073

## **Liquidity Ownership**

The token does not have liquidity at the moment of the audit, block 16860073

<sup>\*</sup> The tokens on industry-standard burn wallets are not included on the top 10 wallets calculations

#### **Disclaimer**

KISHIELD has conducted an independent audit to verify the integrity of and highlight any vulnerabilities or errors, intentional or unintentional, that may be present in the codes that were provided for the scope of this audit. This audit report does not constitute agreement, acceptance or advocation for the Project that was audited, and users relying on this audit report should not consider this as having any merit for financial advice in any shape, form or nature. The contracts audited do not account for any economic developments that may be pursued by the Project in question, and that the veracity of the findings thus presented in this report relate solely to the proficiency, competence, aptitude and discretion of our independent auditors, who make no guarantees nor assurance that the contracts are completely free of exploits, bugs, vulnerabilities or deprecation of technologies.

All information provided in this report does not constitute financial or investment advice, nor should it be used to signal that any persons reading this report should invest their funds without sufficient individual due diligence regardless of the findings presented in this report. Information is provided 'as is', and KISHIELD is under no covenant to the completeness, accuracy or solidity of the contracts audited. In no event will KISHIELD or its partners, employees, agents or parties related to the provision of this audit report be liable to any parties for, or lack thereof, decisions and/or actions with regards to the information provided in this audit report.

The assessment services provided by KISHIELD is subject to dependencies and under continuing development. You agree that your access and/or use, including but not limited to any services, reports, and materials, will be at your sole risk on an as-is, whereis, and as-available basis. Cryptographic tokens are emergent technologies and carry with them high levels of technical risk and uncertainty. The assessment reports could include false positives, false negatives, and other unpredictable results. The services may access, and depend upon, multiple layers of third-parties.
