- **8 Liquidity Ownership**
- 9 Disclaimer

Audit Summary

This report has been prepared for Pig Token on the Cronos network. KISHIELD provides both client-centered and user-centered examination of the smart contracts and their current status when applicable. This report represents the security assessment made to find issues and vulnerabilities on the source code along with the current liquidity and token holder statistics of the protocol.

A comprehensive examination has been performed, utilizing Cross Referencing, Static Analysis, In-House Security Tools, and line-by-line Manual Review.

The auditing process pays special attention to the following considerations:

- Ensuring contract logic meets the specifications and intentions of the client without exposing the user's funds to risk.
- Testing the smart contracts against both common and uncommon attack vectors.
- Inspecting liquidity and holders statistics to inform the current status to both users and client when applicable.
- Assessing the codebase to ensure compliance with current best practices and industry standards.
- Verifying contract functions that allow trusted and/or untrusted actors to mint, lock, pause, and transfer assets.
- Thorough line-by-line manual review of the entire codebase by industry experts.

Project Overview

Token Summary

| Parameter | Result |
|---------------|--|
| Address | 0xa507b4c9cd572c563a462d43076a124599360443 |
| Name | Pig |
| Token Tracker | Pig (PIG) |
| Decimals | 9 |
| Supply | 1,000,000,000 |
| Platform | Cronos |
| compiler | v0.8.6+commit.11564f7e |
| Optimization | Yes with 200 runs |
| LicenseType | MIT |
| Language | Solidity |
| Codebase | https://cronoscan.com/ address/0xa507b4c9cd572c563a462d43076a124599360443 |
| Url | https://www.pig-cro.com/ |

Main Contract Assessed

| Name | Contract | Live |
|------|--|------|
| Pig | 0xa507b4c9cd572c563a462d43076a124599360443 | Yes |

Smart Contract Vulnerability Checks

| Vulnerability | Automatic Scan | Manual Scan | Result |
|--|-------------------|----------------|------------------------|
| Unencrypted Private Data On-Chain | Complete | Complete | ✓ Low / No Risk |
| Code With No Effects | Complete | Complete | ✓ Low / No Risk |
| Message call with hardcoded gas amount | Complete | Complete | ✓ Low / No Risk |
| Hash Collisions With Multiple Variable Length Arguments | Complete | Complete | ✓ Low / No Risk |
| Unexpected Ether balance | Complete | Complete | ✓ Low / No Risk |
| Presence of unused variables | Complete | Complete | ✓ Low / No Risk |
| Right-To-Left-Override control character (U+202E) | Complete | Complete | ⊘ Low / No Risk |
| Typographical Error | Complete | Complete | ✓ Low / No Risk |
| DoS With Block Gas Limit | Complete | Complete | ✓ Low / No Risk |
| Arbitrary Jump with Function Type Variable | Complete | Complete | ✓ Low / No Risk |
| Insufficient Gas Griefing | Complete | Complete | ✓ Low / No Risk |
| Incorrect Inheritance Order | Complete | Complete | ✓ Low / No Risk |
| Write to Arbitrary Storage Location | Complete | Complete | ✓ Low / No Risk |
| Requirement Violation | Complete | Complete | ✓ Low / No Risk |
| Missing Protection against Signature Replay Attacks | Complete | Complete | ⊘ Low / No Risk |
| Weak Sources of Randomness from Chain Attributes | Complete | Complete | ✓ Low / No Risk |

| Vulnerability | Automatic Scan | Manual Scan | Result |
|--------------------------------------|-------------------|----------------|-----------------|
| Authorization through tx.origin | Complete | Complete | ✓ Low / No Risk |
| Delegatecall to Untrusted Callee | Complete | Complete | ✓ Low / No Risk |
| Use of Deprecated Solidity Functions | Complete | Complete | ✓ Low / No Risk |
| Assert Violation | Complete | Complete | ✓ Low / No Risk |
| Reentrancy | Complete | Complete | ✓ Low / No Risk |
| Unprotected SELFDESTRUCT Instruction | Complete | Complete | ✓ Low / No Risk |
| Unprotected Ether Withdrawal | Complete | Complete | ✓ Low / No Risk |
| Unchecked Call Return Value | Complete | Complete | ✓ Low / No Risk |
| Outdated Compiler Version | Complete | Complete | ✓ Low / No Risk |
| Integer Overflow and Underflow | Complete | Complete | ✓ Low / No Risk |
| Function Default Visibility | Complete | Complete | ✓ Low / No Risk |

Contract Ownership

The contract ownership of Pig is not currently renounced. The ownership of the contract grants special powers to the protocol creators, making them the sole addresses that can call sensible ownable functions that may alter the state of the protocol.

The current owner is the address 0x0baa68789b9B893a6eC52e574ff172b112e80Fd9 which can be viewed from:

HERE

The owner wallet has the power to call the functions displayed on the priviliged functions chart below, if the owner wallet is compromised this privileges could be exploited.

We recommend the team to renounce ownership at the right timing if possible, or gradually migrate to a timelock with governing functionalities in respect of transparency and safety considerations.

Important Notes To The Users:

- The owner cannot mint tokens after intial deployment.
- The owner cannot stop Trading.
- The owner cannot change the max tx amount.
- Once the owner renounces ownership of the contract, none of the following are applicable.
- The owner can set the buy/sell fees up to 15%.
- The owner can add/exclude addresses from fees.
- The owner can enable/disable the max wallet limit.
- The owner can add/exclude addresses from wallet limit.
- The owner can change the wallet limit with no restrictions.
- No high-risk Exploits/Vulnerabilities Were Found in token Source Code.

Audit Passed

Findings Summary

Classification of Issues

| Severity | Description |
|----------|---|
| High | Exploits, vulnerabilities or errors that will certainly or probabilistically lead towards loss of funds, control, or impairment of the contract and its functions. Issues under this classification are recommended to be fixed with utmost urgency |
| Medium | Bugs or issues with that may be subject to exploit, though their impact is somewhat limited. Issues under this classification are recommended to be fixed as soon as possible. |
| Low | Effects are minimal in isolation and do not pose a significant danger to the project or its users. Issues under this classification are recommended to be fixed nonetheless. |
| Info | Consistency, syntax or style best practices. Generally pose a negligible level of risk, if any. |

Findings

| Severity | Found |
|----------|-------|
| High | 0 |
| Medium | 0 |
| Low | 0 |
| Info | 5 |
| Total | 5 |
| | |

Findings

Variables could be declared as constant

| ID | Severity | Contract | Function |
|----|---------------------------------|----------|---|
| 01 | Informational | Pig | variables _lockTime, asdasd, WCRO, _decimals, _name, _symbol, deadAddress |

Description

Gas Optimization. Variables that are never changed could be declared as constant.

Recommendation

We recommend declaring those variables as constant.

Public function that could be declared external

| ID | Severity | Contract | Function |
|----|---------------------------------|----------|--|
| 02 | Informational | Pig | Functions minimumTokensBeforeSwapAmount, setMarketPairStatus, setIsExcludedFromFee, setSwapAndLiquifyEnabled, setSwapAndLiquifyByLimitOnly, getCirculatingSupply |

Description

Gas Optimization. Public function that could be declared external

Recommendation

Public functions that are never called by the contract should be declared external to save gas.

Missing events arithmetic

| ID | Severity | Contract | Function |
|----|---------------------------------|----------|--|
| 03 | Informational | Pig | Missing events for setBuyTaxes, setSelTaxes, setDistributionSettings, setWalletLimit, setNumTokensBeforeSwap |

Description

Functions that change critical arithmetic parameters should emit an event.

Recommendation

Emit corresponding events for critical parameter changes.

Too many digits

| ID | Severity | Contract | Function |
|----|---------------------------------|----------|---|
| 04 | Informational | Pig | Variables _totalSupply, _walletMax, minimumTokensBeforeSwap |

Description

Literals with many digits are difficult to read and review.

Recommendation

Make use of scientific notation, use underscores, and/or use ether suffix.

Unused Variable

| ID | Severity | Contract | Function |
|----|---------------------------------|----------|-----------------------------|
| 05 | Informational | Pig | Variables asdasd, _lockTime |

Description

Variables are never used in the contract logic.

Recommendation

We recommend deleting this variable.

Priviliged Functions (onlyOwner)

| Function Name | Parameters | Visibility |
|----------------------------------|--|------------|
| setMarketPairStatus | address account, bool newValue | public |
| setIsExcludedFromFee | address account, bool newValue | public |
| setBuyTaxes | uint256 newLiquidityTax, uint256 newMarketingTax, uint256 newTeamTax | external |
| setSelTaxes | uint256 newLiquidityTax, uint256 newMarketingTax, uint256 newTeamTax | external |
| setDistributionSettings | uint256 newLiquidityShare, uint256 newMarketingShare, uint256 newTeamShare | external |
| enableDisableWalletLimit | bool newValue | external |
| setIsWalletLimitExempt | address holder, bool exempt | external |
| setWalletLimit | uint256 newLimit | external |
| setNumTokensBeforeSwap | uint256 newLimit | external |
| setMarketingWalletAddress | address newAddress | external |
| setTeamWalletAddress | address newAddress | external |
| setSwapAndLiquifyEnabled | bool _enabled | public |
| setSwapAndLiquifyByLimitOn ly | bool newValue | public |
| swapAndLiquify | none | private |

Statistics

Liquidity Info

| Parameter | Result |
|-----------------|--|
| Pair Address | 0x069bfbff9a5fd68b7f1e42107f9960d3845cf978 |
| PIG Reserves | 0.00 PIG |
| CRO Reserves | 0.00 CRO |
| Liquidity Value | \$0 USD |

Token (PIG) Holders Info

| Parameter | Result |
|-----------------------|-------------------|
| PIG Percentage Burnt | 0.00% |
| PIG Amount Burnt | 0 PIG |
| Top 10 Percentage Own | 100.00% |
| Top 10 Amount Owned | 1,000,000,000 PIG |
| Top 10 Aprox Value | \$NaN USD |

LP (PIG/CRO) Holders Info

| Parameter | Result |
|--------------------------|--------|
| PIG/CRO % Burnt | 0.00% |
| PIG/CRO Amount Burnt | 0 PIG |
| Top 10 Percentage Owned | 0.00% |
| Top 10 Amount Owned | 0 PIG |
| Locked Tokens Percentage | 0.00% |
| Locked Tokens Amount | 0 PIG |

^{*} All the data diplayed above was taken on-chain at block 2505554

Liquidity Ownership

The token does not have liquidity at the moment of the audit, block 2505554

^{*} The tokens on industry-standard burn wallets are not included on the top 10 wallets calculations

Disclaimer

KISHIELD has conducted an independent audit to verify the integrity of and highlight any vulnerabilities or errors, intentional or unintentional, that may be present in the codes that were provided for the scope of this audit. This audit report does not constitute agreement, acceptance or advocation for the Project that was audited, and users relying on this audit report should not consider this as having any merit for financial advice in any shape, form or nature. The contracts audited do not account for any economic developments that may be pursued by the Project in question, and that the veracity of the findings thus presented in this report relate solely to the proficiency, competence, aptitude and discretion of our independent auditors, who make no guarantees nor assurance that the contracts are completely free of exploits, bugs, vulnerabilities or deprecation of technologies.

All information provided in this report does not constitute financial or investment advice, nor should it be used to signal that any persons reading this report should invest their funds without sufficient individual due diligence regardless of the findings presented in this report. Information is provided 'as is', and KISHIELD is under no covenant to the completeness, accuracy or solidity of the contracts audited. In no event will KISHIELD or its partners, employees, agents or parties related to the provision of this audit report be liable to any parties for, or lack thereof, decisions and/or actions with regards to the information provided in this audit report.

The assessment services provided by KISHIELD is subject to dependencies and under continuing development. You agree that your access and/or use, including but not limited to any services, reports, and materials, will be at your sole risk on an as-is, whereis, and as-available basis. Cryptographic tokens are emergent technologies and carry with them high levels of technical risk and uncertainty. The assessment reports could include false positives, false negatives, and other unpredictable results. The services may access, and depend upon, multiple layers of third-parties.
